COLLECTION 2023 - 2024

Terms & conditions

Catalogue edition 02/2023

The data in this catalogue are provided in good faith and only for your information. This data may not be used against BEL Lighting.

Prices valid from 01.02.2023 and cancels all previous price lists.

Prices ex works and without taxes (VAT, Recycling contribution,...).

BEL LIGHTING reserves all rights to alter all product price and data any time, without any notice.

The general BEL LIGHTING conditions of sale are always applicable.

Nothing in this catalog may be reproduced without permission in writing from the BEL LIGHTING company.

The design, production and assembling are all made in the company.

We use solid and durable materials like stainless steel, aluminium, brass, copper, Belgian blue stone and the exotic wood "Iroko".

BEL LIGHTING is certified with a quality management system in conformance with ISO 14001-2015 & ISO 9001-2015

The ISO standard specifies requirements for organizations of any type to demonstrate the ability to consistently provide services and products that consistently meet client requirements and aim to enhance customer satisfaction through application and improvement of the quality management system.

The ISO 14001:2015 Specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance.

The ISO 9001:2015 Quality Management System provides a framework for implementation, maintenance, and continual improvement of quality best practices.

Bel Lighting offers you the possibility to extend the initial legal guarantee of 2 years from most of our lights in adding 3 more years. You should get, in total, 5 years guarantee !
Most of our lights have also 15 years guarantee against perforation.

For use in an aggressive environment (near the sea,...), we recommend to use our stainless steel fixtures with an electro-polishing treatment, see info pages in our general catalog.

To have access to the service, fill in the document online in the 3 months after your purchase.

Led flood light

EXTERIOR LIGHTING
FLOOD LIGHT

Advantages

- Ultra compact design & robust (IK06)
- Low cost light fixture

Ultra-compact LED projector, IP54 waterproof, allowing the enhancement of exterior or interior parts, ideally designed for use under veranda, under carport, under balcony, under cornice, etc... It can also be used with accessory Stem B to be pricked directly into the ground. This luminaire is manufactured by machining process and it has a very good light output, it is an excellent solution for many lighting installations.

EXTERIOR LIGHTING
FLOOD LIGHT

Advantages

- Timeless design & robust (IK06)
- Made in copper and fully flexible
- With led CRI>90 as standard for model 3,2W

Ultra small outdoor luminaire made entirely of copper, SAMI has a flexible stem providing a multitude of possible orientations to fit perfectly all your needs of originality.

Designed to be pricked into the ground in the middle of nature in order to fit perfectly in your garden, it can also be supplied upon request in a single or multiple mounting plate which then allows rigid fixation on the ground but also on the wall or the ceiling.

With its low power consumption, it is an ecological fixture with minimal impact on the environment.

SAMI is an ideal solution to create decorative environments, lighting a path or other outside installation.

Advantages

- Timeless design & robust (IK07)
- With anti-glare ring as standard
- Available with narrow beam angle 10° FWHM
- With led CRI>90 as standard
- Beams with high lighting efficiency

Small waterproof IP66 led projector allowing the enhancement of the exterior parts of buildings to create atmospheres or illuminate an alley.

This very robust luminaire is manufactured by machining process. Very good light output and anti-glare cap are the main features of the LENA PRO series which combines high efficiency and long life thus emphasizing the quality of light. It is an ideal solution for many outdoor lighting installations, both in the private and public domain.

- Beams with high lighting efficiency

Small waterproof IP66 led projector allowing the enhancement of the exterior parts of buildings to create atmospheres or illuminate an alley.

This very robust luminaire is manufactured by machining process. Very good light output, anti-glare cap and invisible cable are the main features of the LENA PRO series which combines high efficiency and long life thus emphasizing the quality of light. Luminaire to be adapted on a fixing bracket for rigid fixing to the ground, wall or ceiling, it can also be used with a rod to be inserted into the ground in order to integrate ideally into the garden. It is an ideal solution for many outdoor lighting installations, both in the private and public domain.

Maxima-65

DESCRIPTION

Body made in solid stainless steel, brass or aluminum
 Screws in stainless steel
 Degree of protection IP65 - IK07
 Safety clear plexiglass
 Dimmable Led 230V incorporated
 Provided with 1m cable

230V
6W

ACCESSORIES

- Base & stem for ground/wall/ceiling
- Stem with spike for ground fixing: Stem B / E
- Anti-glare ring - ref: AC.7002.AG._._

Advantages

- Timeless design & robust (IK07)
- With diffuse beam angle ~140°
- To use directly on 220-240V mains voltage
- Rod made in copper and fully flexible
- Available on request with led 6,5W or 9,5W 350mA with high lighting efficiency.

Outdoor luminaire made of solid brass manufactured by machining process, SALSA-S has a totally flexible stem providing a multitude of possible orientations to fit perfectly all your needs of originality. Designed to be pricked into the ground in the middle of nature in order to fit perfectly in your garden, it can also be supplied upon request in a plate which then allows rigid fixation on the ground. With its low power consumption, it is an ecological fixture with minimal impact on the environment. SALSA-S is an ideal solution to create decorative environments, lighting a path or other outside installation.

ON REQUEST

Other cable length (customized)
Base for strap around a tree

Lena Base for Strap
(on request)

Advantages

- Timeless design & robust (IK07)
- With hidden cable for model Lena GU-B
- With anti-glare ring as standard
- Equipped with a GU10 socket to easily replace a bulb.

Small waterproof IP66 GU10 projector allowing the enhancement of the exterior parts of buildings to create atmospheres or illuminate an alley.

This very robust luminaire is manufactured by machining process. Anti-glare cap and invisible cable for model «B» are the main features of the LENA GU series. Luminaire to be adapted on a fixing bracket for rigid fixing to the ground, wall or ceiling, it can also be used with a rod to be inserted into the ground in order to integrate ideally into the garden. It is an ideal solution for many outdoor lighting installations.

* D1 = Dimmable with leading-edge and trailing edge TRIAC dimmers

Installation with a Constant Current power supply AC/CC

Installation with a DALI interface & push dimming function

10 drivers (max.) synchronization (1 master + 9 slaves)
 Maximum length of the cable from first driver to last driver is 15 meter.

DALI interface

PUSH dim

Warning: The push button can only be connected between the PUSH terminal and AC/L. It would cause short circuit if it is connected to AC/N.

Led Power Supply

Information

Installation with a Constant Voltage power supply **DC/CC**

Advantages:

- a very small driver DC/CC per luminaire (with DL011.0350.67D8)
- if one luminaire is defect, only this is off
- the whole installation is in very low voltage for better safety in the garden

Advantages:

- the whole installation is in very low voltage for better safety in the garden
